About

Software engineer with 4+ years building web and mobile applications, recently focused on React Native. I have worked on digitalization projects for public and private sectors, from design through production, and care about scalable systems, clean architecture and performance. Available for remote collaborations.

Experience

Frontend Developer
Datakanto
Consultant · Remote
2025

- Designed the pages and turned the mockups into a static Astro site
- Built responsive, reusable page sections so the team can add content without touching layout code

Software Engineer
Itwedo
Consultant · Remote
2025 – Present

- Contribute to the development of the super app on iOS and Android
- Partially redesigned the existing app screens and navigation

Mobile Developer
RELIA Consulting
Consultant · Remote
2024

- Redesigned the existing application and set up its base architecture
- Integrated the design system as shared React Native components

Fullstack JS Developer
Team Tic
Consultant · Antananarivo
2023 – 2024

- Built the React and TypeScript front end and the Express API behind it
- Modelled the PERSUAP document data in SQL Server

React Developer
Team Tic
Consultant · Antananarivo
2023 – 2024

- Created the React and TypeScript front end of the application
- Turned paper-based staff management procedures into forms and dashboards

Software Engineer
Tenaflil
Full-time · Antananarivo
2023

- Studied the existing system to understand the target users
- Wrote a technical design document to choose the mobile libraries

Mobile Developer
EAM Consulting
Consultant · Antananarivo
2023 – 2025

- Created the React Native app used by field agents to record roads, bridges and other infrastructure
- Built data-entry forms with photos and GPS position for each surveyed asset

Software Auditor & Data Engineer
MNDPT
Internship · Antananarivo
2022 – 2023

- Audited the EDUTIC system and reported on its weak points
- Cleaned the EDUTIC database: duplicates, missing values and inconsistent records

Fullstack JS Developer
Afridoctor
Full-time · Antananarivo
2021 – 2022

- Maintained the site with the AfriDoctor team: bug fixes and small improvements
- Built new features across the React front end and the Node.js GraphQL API

Side projects

Axiom ↗

React Native · Expo · TypeScript · Astro

Mobile-first component registry to kickstart React Native apps.

Chess in React ↗

React · Typescript · Tailwind

A simple chess game built with React.
